Outside Play & Cats and Dogs

Explorers have been enjoying physical outdoor play. Teachers have observed a wide range of individual and group activities. As they create more elaborate play with rules, they include different friends in their experiences.

Teachers listened during morning meeting as some Explorers shared about Cats and Dogs.

Charlotte: My cat at home her name is Cody. Sometimes my Cody loves me. Sometimes she hits me and sometimes she goes like this, "Hiss!" Sometimes she scratches me.

Julian: Sometimes my Gracie Cat. she meows and waking me up. Then when she's downstairs on the coffee table, she purrs and that's how I know she likes it.

Ava: When cats goes, "Hiss!" That means them need some space and then the cat needs some food. Cats eat vegetables.

Jojo: So I hug Nola when she still loves me. I hug her on my mom's bed. She's so cute. Pharaoh doesn't scratch me. After school, Nola just scratched me when I was two. My cats are my family.

Mia: I have a lovey, a cat named Trollie, and she says meow meow.

Mason: (Crawls around saying meow, meow.)

Edith: Sometimes when they need space; when they're upset. And my mom took the cat to the doctor and the doctor kept the cat for a long time. One cat is named Million and there's another black one, Nico. Hadley sometimes is gentle and sometimes she's not.

Matthew: My mommy had one; she had both. And the dog and cat were playing out in the snow and the doggie got hurt on his leg and the cat got lost.

Louie: So cats and dogs like my cats. My cats live on a new road called Laconia Road; it's like super far away. A neighbor, that's my friend too; I don't think it has a cat or dog. "Cause like I don't even know if they have a cat or dog. Maybe they do or maybe they don't.

Bradley: I have a fish, Mickey, and a cat, Tabernacle, and a dog, Puppadoo. The cat scratch rugs. Puppadoo doesn't scratch; he pops pools. The fish swims in water, not in the ocean; she swims at home and I take care of her.
